

Mini SNMP IPv6 card

PN: SCMS100035

SAP NAME: SNMP CARD INSIGHTPOWER G3 MINI (IPV6)

Description: Mini SNMP IPv6 card provides communication interface between UPS and network. Card allows remote control and monitoring of the UPS through network. Card has to be install in UPS with Mini card slot.

Technical specifications:

Network Connection	RJ-45 connector (10/100M)
Operating Temperature	0 - 60° C
Operating Humidity	0 - 90 %
Power Input	12V DC
Power Consumption	2 Watts maximum
Size	87 x 70 x 30 mm (W x D x H)
Weight	75 g

Features:

- Network UPS management - allows monitoring of the UPS using Delta MIB (Management Information Base), Internet Browser.
- Configure UPS and system functions from any client (password protected).
- Keep event logs and metering data - provides a history data of UPS power events, power quality, UPS status and battery condition.
- Notification of users via SNMP Traps, Informs and e-mail through SMTP.
- Telnet, BOOTP/DHCP, NTP.
- HTTPS, SSH, SFTP and SNMPv3 security protocols.
- Remote event log management through syslog.
- IPv4, IPv6 protocols.
- Modbus TCP.

Applicable to UPS:

- N series from Rev. 05.
- R series.
- RT series 5-10kVA.
- MX series.
